

Technical Specification Sheet

BALL VALVE LOCKOUT WITH EXTENTION

Material: Polypropylene

Available in four different sizes with/without extension to lockout numerous ball valves.

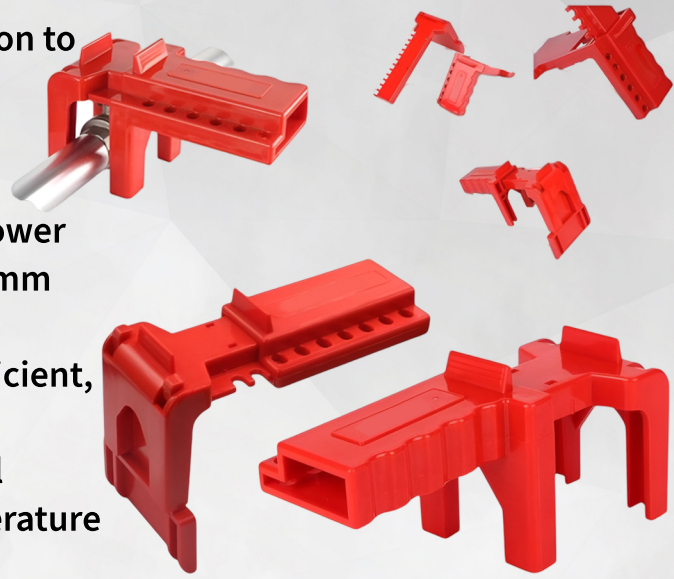

Locking holes: 6 Numbers.

Accepts shackle maximum up to: 9mm

Size: Total Lenght-150mm upper part depth 62mm lower part depth 75mm back height 75mm front height 25mm

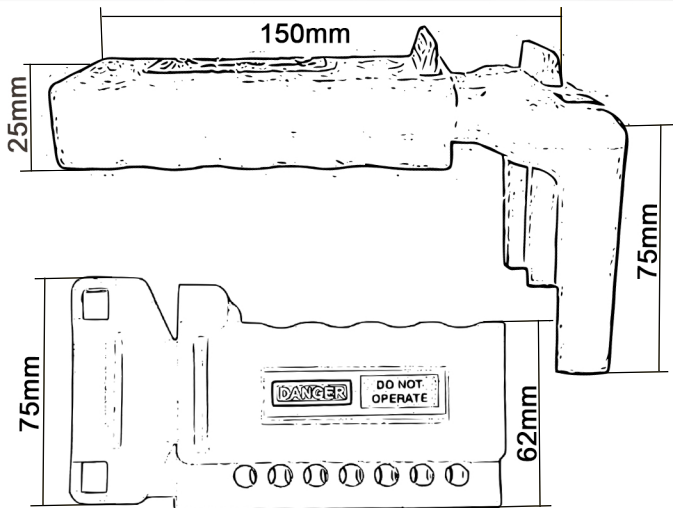

Advantage:

1. This device is fully dielectric device that is very efficient, inexpensive and safe.
2. Also highly resistant to solvent and other chemical products, resist cracking, abrasion and higher temperature changes.
3. This device is used to lockout the movement of lever for ball valve either in open or closed position, It can lockout the pipes with big diameter range as well as small diameter range. For installation place the cover on the top of valve handle then fix and adjust the slider and padlock + tag it.

LS-BA66E

Intallation
