

Technical Specification Sheet

PLUG POWER LOCKOUT

Directly inserted in power source, this lockout device can effectively insulate electric power energy and prevent accidental operation during maintenance.

Can put a padlock or hasp to ensure the lockout of power source.

Size-height: 118mm Width: 45mm

Base dia: 52mm

Its installation needs no tools.

The eye-catching bright red alerts the people who intend to restore the energy.

Two labels are provided on both sides of the lock to warn that the power plug is locked out and cannot be removed or record the information on the person who is performing the lock-out procedure.
