

3M Peltor H7A PTL™ Earmuff

The PTL listen-only headband headset offers enhanced listening with the push of a button. The practice of lifting or removing an earmuff to listen can compromise hearing protection for wearers. The PTL earmuff resolves this problem by allowing the wearer to boost the volume of ambient sounds, including face-to-face conversations, as needed. This comfortable and durable earmuff allows for long-term use under exacting conditions.

3M Peltor H7A PTL Earmuff

NRR 26 dB†

3M Peltor H7P3E-PTL Earmuff

NRR 25 dB†

- » Push button on cup for listening mode
- » Pass-through sound limited to 87 dB
- » Auto-switches to full protection after 30 seconds or when button is pressed again
- » Earcups with liquid and foam-filled comfort cushions for long wear and optimum seal
